

Angels & Devas

Heaven Extending to Earth

TOM KENYON

This is heaven extending to Earth.

These are the sounds of the Angelic Realms descending to assist the Devic Realms of Nature and then merging with them to create a symphony of otherworldly sound. This sound meditation was originally created to help with the nuclear disaster at Fukushima. And according to the Hathors, who gave this meditation, persons using this sound meditation can create quantum “field-effects” that are highly beneficial.

This is the original sound meditation looped to extend the vibration allowing you to enter calming and restorative states of mind and body for over an hour.

This is a continuous and repeating sound-field from the Angelic and Devic realms of being. It creates a mesmerizing and transformative effect on consciousness and opens portals of awareness into these subtle realms of perception.

If you place your mental focus on these sounds as you listen to this recording, you can enter into and experience these energetic realities for yourself. Stereo headphones or ear buds are suggested for this type of deeper listening experience.

Some persons have reported beneficial and calming effects in the immediate vicinity by listening to this recording at low volume using stereo speakers.

Do not listen to this recording in situations requiring alertness such as driving a car or operating machinery.

Note: This recording was inspired by the Hathors’ *Fukushima Sound Meditation*, which they created to spiritually assist the Devic Realms (Nature Spirits) in the vicinity around the nuclear reactor at Fukushima. If you would like to read more about the original sound piece and how to work with the *Fukushima Sound Meditation* go to the Hathor section of the website (www.tomkenyon.com) and scroll down the titles until you come to the message *Fukushima*.
