

THE SPHERE OF ALL POSSIBILITIES

TOM KENYON

These are live-recordings from a Hathor Transformational Intensive entitled *The Art of Seeding New Realities*, a three-day workshop, which took place in Seattle, Washington (November 2012).

Collectively, these recordings are an intellectual and spiritual journey into the enigmatic nature of personal and planetary transformation, as viewed through the lens of expanded consciousness.

Extraordinary mysteries and unusual abilities arise when we liberate ourselves from personal and cultural presuppositions regarding the nature of time and space.

Within this context, the Hathors (a group of Interdimensional beings) present simple yet potent methods for shifting self-identification from the time and space-bound nature of bodily existence to include aspects of our being that transcend the constraints of time, history and circumstance.

Working with this material (and the methods imparted) can transform your life by changing how you view yourself and your place both within and outside the timeline of your life.

The transformational potential of this Work is amplified through the use of potent sound meditations, many of which dynamically alter brain processing as well as perceived time and space. These types of perceptual alterations, generated through the use of catalytic sound, affect consciousness directly and should not be treated lightly.

Do not listen to any of the sound meditations in situations requiring alertness such as driving a car or operating machinery.

Track titles and their lengths are printed directly on the CDs for ease of reference.
